## INTRODUCTION

This Index is a subject guide to the major articles published in 400 British technical journals in 1964. It comprises about 30,000 entries arranged in a single alphabetical sequence of subject headings, together with supporting references.

### *Subject Scope*

The Index embraces all departments of Engineering and Chemical Technology, together with the various Manufacturing Processes based upon them. The distinction between Pure and Applied science is often extremely difficult to use as a basis for selecting or classifying literature, and although this *Index* is centred upon applied science it also includes a great deal of material on the pure science (i.e. the physics or chemistry) of man-made objects and industrial processes. Instruments of all kinds are covered, irrespective of whether their field of application is in pure or applied science. Articles on the chemistry of individual substances are also indexed, as it is only very rarely possible to assert that a chemical species is entirely without technical interest. The *Index* does not cover Industrial Economics, but it does contain references to articles of a mixed technical-economic character. These are invariably signalled by the subheading 'Industry' as opposed to the more usual 'Manufactures' or 'Production' for the technical processes. Technology also overlaps the field of Management at several points, and here the policy of the *Index* is to include from the management sphere only material on such physical and statistical techniques as work study, ergonomics and operational research. Finally, it should be mentioned that the *Index* omits the applied biological sciences from its purview. Here again a number of borderline subjects are included. For instance, the production technology and the chemistry of food, drugs and pesticides are covered, but the physiological chemical aspects are excluded.

### *Index Structure*

The *Index* is designed primarily as a reference tool for tracing articles on highly specific topics. For this purpose the headings are detailed and generally co-extensive with the subjects of the articles listed.

The basic method of index construction may be illustrated by the treatment of such a subject

as 'Bleaching Cotton by hydrogen peroxide'. A single entry is made with supporting references, as follows:

**COTTON, Bleaching, Hydrogen peroxide.**

**HYDROGEN PEROXIDE, Bleaching, Cotton.**

See COTTON, Bleaching, Hydrogen peroxide

**BLEACHING, Cotton. See COTTON, Bleaching**

Additional facilities are given in two situations. When the first two elements of a heading are in the relation of Whole and Part, as in SHIPS, Diesel engines or MOTOR CARS, Bodies, then a second permuted entry (DIESEL ENGINES, Ships and BODIES, Motor cars) is given under the term representing the Part. This is considered desirable because interest in a particular component may often ignore the more comprehensive unit of which it forms a part. Considerations of a similar character arise in connection with Processes and Applications. The *Index* normally enters under the Application with a reference from the Process. There is a case for substituting a second entry for the reference, but it is felt to be less strong than the case for double entry for Whole-Part and Part-Whole, and it is not possible to have double entry for both in view of economic limitations on the size of the *Index*. The second occasion for the use of double entry is the subject which is a proper name, such as the name of a teaching or research institution, or the name of a prominent structure (realised or unrealised) such as the CHANNEL TUNNEL or FORTH ROAD BRIDGE. In these cases, entries are given both under proper name and under the term for the subject illustrated (e.g. BRIDGES, Suspension and TUNNELS).

In this *Index*, the subjects are entered directly into the alphabetical sequence, and not as sub-headings of more general terms, *as long as they can stand alone with unequivocal meaning*, corresponding to the subject of the article. Thus FUEL CELLS are entered directly, and not under ELECTRO-CHEMISTRY or GENERATORS, Electrical. The purpose here is again to facilitate specific topic searching. Though the *Index* is necessarily a cumbersome tool for broad field searching it has been thought desirable to signpost some varieties of subject relationship. *Index* users often discover pertinent material under a term narrower in meaning than that which they consulted first as approach term. Inquirers primarily interested in a particular application of a process may find useful information on other applications of the same process to parallel situations.

Relational signposting in the *Index* is carried out by references of two kinds. In the first place there are "Related heading" references which refer from more to less general terms. A number of classification schemes have been pressed into service in this connection. Not all of the various hierarchical steps are everywhere included. Thus the names of the various plastics are given as references at Plastics, and not via such intermediate groupings as Synthetic Resin Plastics, and Condensation Polymerised Plastics, though occasionally articles will appear covering these relatively generalised concepts. The "related heading" network for Chemistry is of the simplest kind, pending more fundamental work on classification in this field. No attempt is made to link the various inorganic chemicals, and for organic chemicals only the intermediate concepts "Aliphatic" and "Cyclic" and "Heterocyclic" are brought into the system of references. It may be possible with more experience to clothe this skeleton. For reasons of space no references are given between subheadings under the same main heading (e.g. AIRCRAFT, Engines and AIRCRAFT, Gas turbines). To compensate for this absence brief systematic synopses have been added at the beginning of certain of the longer sequences of subheadings.

The other relation-indicating mechanism is inherent in the system of inversion references, of which an example has already been given for

COTTON, Bleaching, Hydrogen peroxide.

The person searching for this subject may also be marginally interested in (a) Hydrogen peroxide, (b) Hydrogen peroxide bleaching, (c) Bleaching of other cellulosic fibres. The routine instruction is simply to note the sub-heading terms and then look them up in the main sequence. Thus at HYDROGEN PEROXIDE will be found entries for material in this substance in general and on its use for bleaching generally: there will also be references locating headings on its particular applications and the hydrogen peroxide bleaching of particular substances. At BLEACHING will be found entries for articles on bleaching generally, and references to headings on the bleaching of individual substances.

### *Order of Elements in Headings*

Most of the subjects indexed are composite in that they cannot usually be expressed in a single word or phrase. The question therefore arises as to which of the various verbal elements required for the heading shall be entry word and generally as to the order of the other elements in the heading.

The order of verbal elements or components is normally so devised that an account of a process applied to a particular application is placed under the term for the Application. Another invariable

rule is that the various word-elements are arranged left to right in order of decreasing concreteness with the most concrete element as the entry word. There are many situations in which recognisable differences in terms of concreteness and abstractness may not be apparent, and a number of rules have been devised for the indexers which regulate heading component order through a consideration of the relationships between the components. The following table illustrates the more commonly used heading constructions and their natural language equivalents.

### *Compounds which specify a particular type or variety of Thing or Material:*

<i>Heading and subheading</i>	<i>Natural language</i>
1. THING <sub>1</sub> , Thing <sub>2</sub> CONVEYORS, Roller	Conveyors <i>with</i> Rollers
2. FUNCTION, Thing PRINTING, Inks	Inks <i>for</i> Printing
3. THING <sub>2</sub> , Thing <sub>1</sub> BUSES, Garages	Garages <i>for</i> Buses
4. THING, Property FABRICS, Coated	Fabrics <i>with</i> Coating
5. THING <sub>2</sub> , Thing <sub>1</sub> , TURBINES, Rotors THING <sub>1</sub> , Thing <sub>2</sub> ROTORS, Turbines	Rotors <i>of</i> Turbines

### *Compounds denoting Actions or Properties of Things or Materials:*

6. THING, Property BEAMS, Strength	Strength <i>of</i> Beams
7. THING, Action upon it IRON, Corrosion	Corrosion <i>of</i> Iron
8. THING <sub>1</sub> , Action upon it, Thing <sub>2</sub> METALS, Forming, Magnetic pulse	Forming <i>of</i> Metals <i>by</i> Magnetic pulses
9. THING, Action upon it, Byproduct PHTHALIC ANHY- DRIDE, Production, Tail gases	Tail gases <i>as byproduct of</i> Production <i>of</i> Phthalic anhydride
10. THING, Its Action LASERS, Welding	Welding <i>by</i> Lasers

### *Other compounds*

11. ACTION <sub>2</sub> , Action <sub>1</sub> PACKAGING, Label- ling	Labelling <i>for</i> Packaging
--	--------------------------------

## 12. MATERIAL, Diversified role

PLASTICS, Building materials

Plastics as Building materials

N.B.—The subscript figures refer to order in English natural language using prepositions to indicate relationships. The term THING in examples 1–10 includes Materials.

These rules, taken separately or in combination, account for a high proportion of the indexing problems met. It is hoped to amplify them in due course, thus bringing under control the few exceptions which the Index at present contains.

### *Indexing of Locality terms*

A high proportion of the articles indexed deals with objects or activities at particular places. It is of course possible to decide in a general way that the place is or is not significant, but as usual there is a great number of debatable intermediate cases. The radical solution of indexing place in all such cases is ruled out on grounds of space and economics. The practice adopted is as follows:

(1) An article surveying comprehensively the methods practised in a particular country, or a particular species of product produced in a particular country, receives a reference from the country (and from the continent in the case of Africa and South America.

(2) An article dealing with an individual factory or its products does not normally receive a reference from place. Individual structures are not usually specified and referenced by locality, except in the following instances.

*Housing*

*Flats, Maisonnets*

*Churches, Monasteries and similar buildings*

*Government and municipal buildings*

*Town planning topics*

*Mines*

*Pipelines*

*Power stations (including Nuclear and Hydroelectric)*

*Dams*

*Coastal and Flood control works, Drainage, Water engineering*

*Roads*

*Buildings connected with transport.*

### *Ambiguity in headings*

The use of relational criteria in constructing headings goes some way towards reducing ambiguity of index headings. However, the omission of the actual relational terms or phrases can still occasionally lead to uncertainty of interpretation. Often this uncertainty is of a kind that matters little for information retrieval purposes. The heading

METALS, Extrusion, Presses

can mean that the article is about the extrusion by the press or it can be about the press which extrudes. It is doubtful if ambiguity of this kind

is of great practical importance. To distinguish an action, part or property, from the use of an action part or property term to denote a particular kind, e.g. Paint, Stoving—the stoving of paint, and Paint, Stoving, i.e. Stoving paints, the *Index* uses parentheses around a type-specifying word where the distinction seems required. The parentheses have the same sorting value as the commas which they replace.

### *Journals covered*

A list of the journals covered by this volume of the *Index*, together with their publishers' addresses, is to be found at the end of the book. It includes some titles no longer in existence. Society publications simply entitled *Journal of . . .*, *Proceedings of . . .*, or *Transactions of . . .* are entered in the list under the name of the society. (In *Index* citations these journal titles are given in the form used in the journal itself, with the abbreviations shown on page ix.)

Thanks are due to the publishers of many of these journals for supplying copies for indexing and so expediting the work.

### *Selection of articles for the Index*

An attempt has been made to select the more substantial articles published in the journals listed, though no evaluative criteria have been employed. The following types of material are normally excluded: (1) articles comprising less than a page of text and/or diagram in the usual format and typography, (2) brief resumés of symposia and conferences, (3) accounts of exhibitions, and other articles which consist of enumerative descriptions of a variety of products, (4) regular miscellany features, (5) students' features, (6) letters, (7) notes, (8) discussions, (9) book reviews other than essay reviews and review articles.

### *Indexing unit*

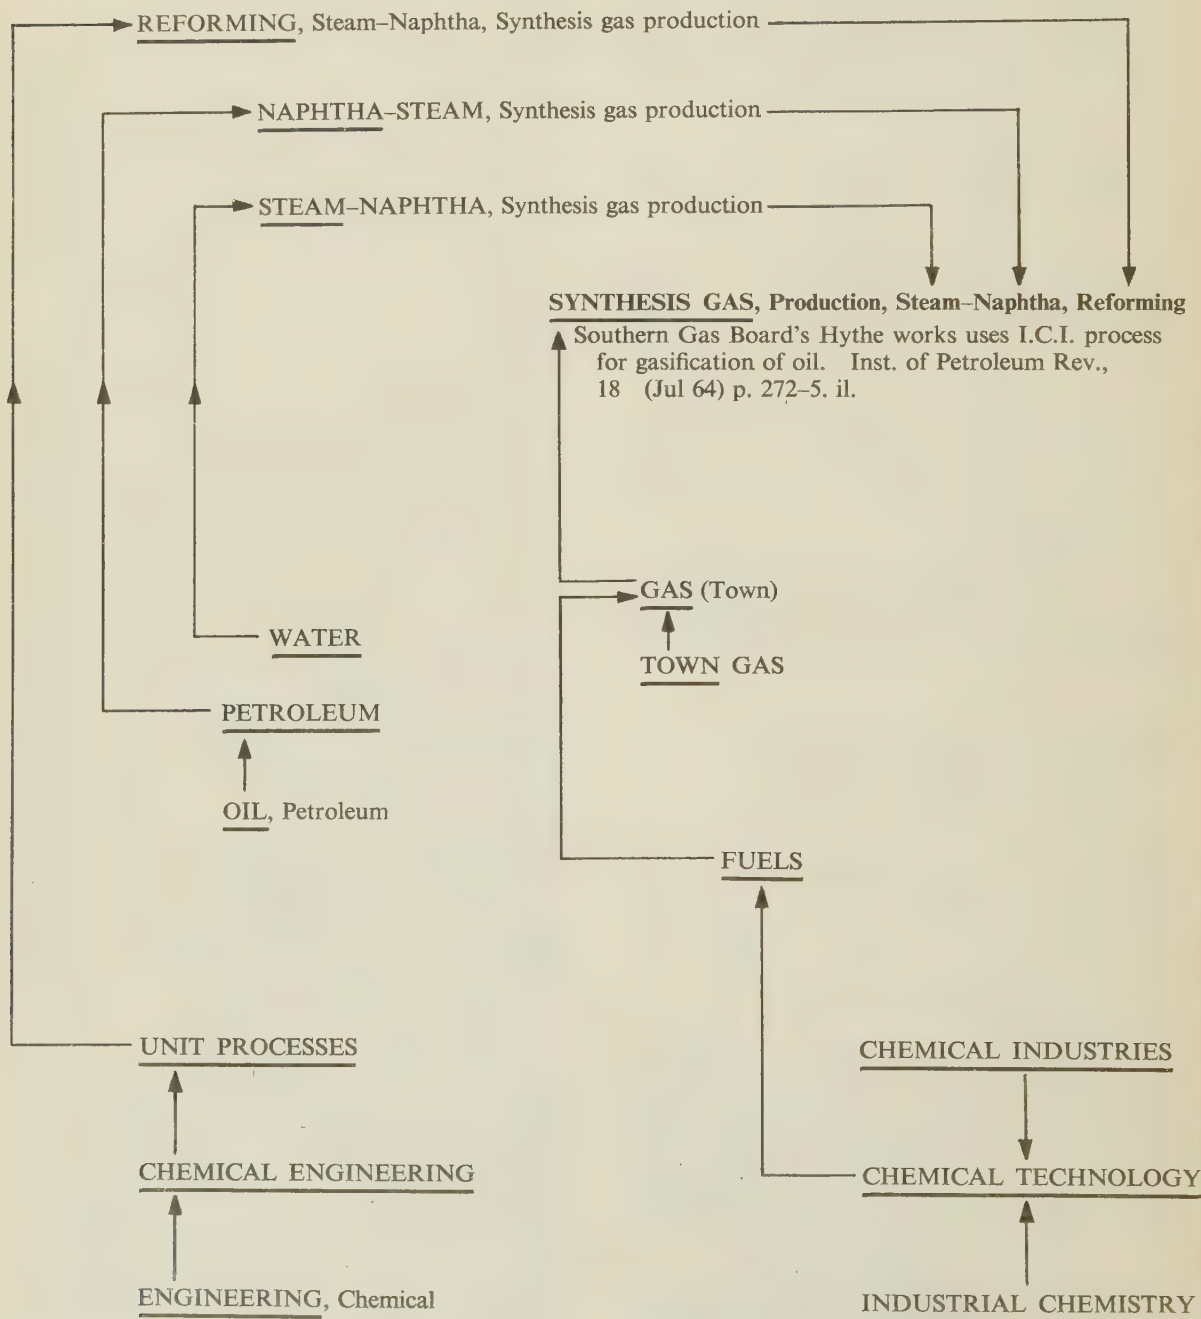

The unit of material indexed is the individual article or the part of an article which appears in a single issue of the journal. The various parts of an article published over several issues are therefore not all given the same heading where they are individually distinctive in subject matter.

### *Synopses*

Brief systematic synopses are provided in some cases where there are long sequences of sub-headings under the same main heading. They are included because no connective references are supplied between sub-headings under the same main heading. They also afford a much simplified bird's eye view of the scope and ramifications of the material indexed under the headings concerned. The terms which are italicised in the synopses are found in their *direct* alphabetical position in the sequence of sub-headings. The terms printed in roman in the synopses are grouping terms only.

# DIAGRAM TO ILLUSTRATE INDEX STRUCTURE

Any of the underlined approach terms can be used for tracing an article on the steam-naphtha process for producing synthesis gas. The arrowed lines represent cross-references.

## ENGINEERING—SUBHEADINGS—Synopsis—cont.

## Materials

## Plant

## Products

ENGINEERING, Aeronautical. See AIRCRAFT

ENGINEERING, Chemical. See CHEMICAL ENGINEERING

ENGINEERING, Civil. See CIVIL ENGINEERING

ENGINEERING, Civil, Chemical engineering plant. See  
CHEMICAL ENGINEERING, Plant, Civil engineering

ENGINEERING, Clyde Valley

Revival on the Clyde. Times Rev. of Industry & Technology,  
2 (Aug 64) p.44+. il.

ENGINEERING, Coal mining. See COAL, Mining, Engineering

ENGINEERING, Computers

Computers and engineers. J. R. Mortlock. Proc. of Instn. of  
Electrical Engrs., 111 (Jan 64) p.153-6. il. refs.

ENGINEERING, Consultants

Changing role of the consulting engineer. Engineering, 197  
(14 Feb 64) p.243

Choice of a career—consulting engineering. A. Pearce.

Chartered Mechanical Engr., 11 (Sep 64) p.461-3. il.

Consulting and advisory role of the engineer of tomorrow.

J. H. Pitchford. Instn. of Mechanical Engrs. Proc., 177  
(1963) p.1-13. il.Design team. P. A. Allward. Consulting Engr., 25 (Apr 64)  
p.369

Meeting the challenge: the role of the consultant. C.

Weiss. Structural Concrete, 2 (Mar/Apr 64) p.86-90

Symposium on evaluation of engineering investment, pt.5:  
the role of the consultant in project planning and control.K. Trickett. Chemical & Process Engrg., 45 (Sep 64)  
p.534-8

ENGINEERING, Coventry

Coventry: city from the ashes. J. Rose. Times Rev. of  
Industry & Technology, 2 (Sep 64) p.44-6. il.

ENGINEERING, Czechoslovakia

Czechoslovak journey, pt.1. Engineer, 217 (28 Feb 64)  
p.412-14. il.Czechoslovak journey, pt.2. Engineer, 217 (6 Mar 64)  
p.454-5. il.Czechoslovak journey, pt.3. Engineer, 217 (13 Mar 64)  
p.495-6. il.

ENGINEERING, Design

Applied mechanics in modern design. W. N. Findley. Bull.  
of Mechanical Engrg. Education, 3 (Apr/Jun 64) p.99-  
177. il. refs.

Choice of a career—design engineering. F. Noblett.

Chartered Mechanical Engr., 11 (Jun 64) p.354-6. il.

Design and productivity. H. G. Conway. Instn. of  
Mechanical Engrs. Proc., 177 (1963) p.1181-200. il. refs.Design and the engineer (summary) Q. Hogg. Chemistry &  
Industry (21 Mar 64) p.508

Design conference that was different. P. J. Wallace.

Engineer, 217 (24 Apr 64) p.725-7

Design engineer. C. V. Chester-Browne. Times Rev. of  
Industry & Technology, 2 (May 64) p.50-1. il.Design in productivity—the next five years. W. H. Mayall  
et.al. Engrg. Designer (Jan 64) p.3-13Designers and management. H. N. G. Allen. Engineer, 217  
(13 Mar 64) p.473Engineering design after Feilden. Engineering, 197  
(1 May 64) p.594-5. il.Feilden Committee on Engineering Design: progress on  
recommendations. Production Engr., 43 (Apr 64) p.205-6Further to Feilden. A. H. Roach. Engrg. Materials &  
Design, 7 (Feb 64) p.111Good design pays. Work Study & Management, 8 (Jun 64)  
p.268-72. il.

ENGINEERING, Design—cont.

Implementing the Feilden Report on engineering design.

Engineer, 217 (6 Mar 64) p.429

Inspired design teams! B. Bousfield. Eng. Designer (Apr  
64) p.3-5. il.Progress in engineering design. Mass Production, 40 (Apr  
64) p.62-4. il.Research at NEL improves engineering design. Production  
Engr., 43 (Oct 64) p.518-19Towards better engineering design: a chronicle of efforts to  
implement the recommendations of the Feilden Report.

Mechanical World, 144 (Apr 64) p.133

Trends in engineering design (extracts) H. G. Burgess. Gas  
J., 317 (22 Jan 64) p.92+. refs.Two cultures in engineering design. Engineering, 197 (13  
Mar 64) p.373. il.What is an engineering detail? P. J. Wallace. Engineer, 218  
(27 Nov 64) p.887-8

ENGINEERING, Design, Computers

Computers in the drawing office. Metalworking Production,  
108 (7 Oct 64) p.73-6. il.

How the computer can help the designer. D. F. Walker.

New Scientist, 24 (12 Nov 64) p.450-3. il.

Increasing importance of computers in design. Machinery,  
104 (27 May 64) p.1191+

ENGINEERING, Design, Education

Elements of engineering design—at 'A' level. R. Foy.

Technical Education, 6 (Nov 64) p.547+. il.

Experiment in education for design. J. G. Wistreich & M. de  
Malherbe. Chartered Mechanical Engr., 11 (Mar 64)  
p.149-51. il.Further notes in support of "a design for engineering design  
education". W. A. A. Witham. Engrg. Designer (Apr 64)  
p.5-7Mechanical design in a College of Advanced Technology. A.  
Baker. Engineer, 217 (3 Apr 64) p.605Proposal for an "Armistice" in the debate on "a design for  
engineering design education". P. J. Wallace. Engrg.  
Designer (Jun 64) p.12-13Review of design courses [list of courses relevant to  
engineering design, available in England, 1964-5 session]

Engrg. Materials &amp; Design, 7 (Sep 64) p.625+

Teaching a systematic design procedure. D. H. W. Hykin.

Chartered Mechanical Engr., 11 (Sep 64) p.444-7. il.

Teaching design—designing for production, pt.6. H. Peck.  
Engrg. Designer (Feb 64) p.4-13. il.Teaching design—designing for production, pt.8. H. Peck.  
Engrg. Designer (Apr 64) p.8-9Teaching design—designing for production, pt.9. H. Peck.  
Engrg. Designer (May 64) p.7-11. il.Teaching engineering design. R. L. Aston. Design &  
Components in Engrg. (8 Oct 64) p.22+. il.

ENGINEERING, Design, Education, Postgraduate

Postgraduate design teaching for specialists. D. Hower.

Chartered Mechanical Engr., 11 (Nov 64) p.566-9. il.

ENGINEERING, Design, Photography

High speed photography as an aid in design work. J. R.

Golan. Design & Components in Engrg. (22 Oct 64)  
p.6-11. il.

ENGINEERING, Design, Education, Projects

Project training for design. B. W. Aston. Chartered

Mechanical Engr., 11 (Dec 64) p.648-9. il.

ENGINEERING, Design, Education, Sandwich courses

Teaching design in sandwich courses. W. A. Pullman.

Chartered Mechanical Engr., 11 (Dec 64) p.618-21. il.

ENGINEERING, Design, Scaling

Adapting designs for different sizes. P. W. Agnew. Engine-  
ering, 197 (3 Apr 64) p.478-9. il.

ENGINEERING, Design, Work study

Work study in machine and product design. E. Matchett.

Work Study &amp; Management, 8 (Jan 64) p.21-8. il.

**ENGINEERING, Dip. Tech., Courses, Projects**

Dip. Tech. (Eng) projects. E. L. Houghton. Technical Education, 6 (Mar 64) p.122+

**ENGINEERING, Drawing**

Drawing and the art of communication. Engineering, 197 (14 Feb 64) p.244-5. il.

Drawing office procedure. B. Bousfield. Engng. Designer (Oct 64) p.5-10

Engineering drawing: what should we teach? H. Loukes. Technical Education, 6 (Dec 64) p.610

**ENGINEERING, Drawing, Drafting machines**

Automation and the labour force of the future. J. Wellens. Technical Education, 6 (Oct 64) p.490+. il.

**ENGINEERING, Drawing, Education**

Effect of open laboratory, scheduled laboratory and visual aids on scholastic attainment in engineering graphics courses. J. N. Clausen, R. D. Springer & L. G. Palmer. Bull. of Mechanical Engng. Education, 3 (Jul/Sep 64) p.247-62. il. refs.

Feedback for teachers of engineering drawing, pt.1. S. J. Cook & D. L. Thurlow. Technical Education, 6 (Apr 64) p.196-8. il.

Feedback for teachers of engineering drawing, pt.2. S. J. Cook & D. L. Thurlow. Technical Education, 6 (May 64) p.256-8. il.

**ENGINEERING, Drawing, Equipment**

Draughtsmanship and its clearer presentation. Municipal J., 72 (3 Jan 64) p.29+

**ENGINEERING, Drawing, Perspective**

New technique for making perspective drawings. Design & Components in Engng. (23 Apr 64) p.12-14. il.

**ENGINEERING, Drawing, Teaching, Visual aids**

Third angle projection, pt.2: sectional views. R. S. Rhodes. Technical Education, 6 (Oct 64) p.507-8. il.

**ENGINEERING, Drawing, Teaching aids**

Aid to technical drawing. B. Farmer. Technical Education, 6 (Mar 64) p.136-7. il.

**ENGINEERING, Drawings, Microfilm**

Aspects of drawing for microfilming. Metalworking Production, 108 (4 Mar 64) p.60-1. il.

Benefits of miniaturisation. J. A. Stevens. Reproduction, 1 (Dec 64) p.20-1. il.

**ENGINEERING, Drawings, Microfilm, Copying, Diazo compounds**

Put your drawings on active microfilm [Caps-Jeffree] Engineering, 198 (18 Sep 64) p.358. il.

**ENGINEERING, Drawings, Photocopying, Equipment**

Photo mechanical reproduction. Light Production Engng., 2 (Feb 64) p.37-9. il.

**ENGINEERING, Drawings, Viewing, Television, Closed circuit**

Closed-circuit television gives shop personnel quick access to drawings. Machine Shop, 25 (Dec 64) p.566-7. il.

**ENGINEERING, Education**

Comparison of some aspects of engineering education in Europe and the United Kingdom: abstract of 'Education for Europe'. Sir Willis Jackson. International J. of Electrical Engng. Education, 1 (Dec 63) p.185-91

Education and training of engineers, pt.1: what do engineers do? G. S. Bosworth. Engineer, 217 (29 May 64) p.927

Education and training of engineers, pt.2: getting to the root of the problem. G. S. Bosworth. Engineer, 217 (5 Jun 64) p.986-7

Education and training of engineers, pt.3: step towards solving the problem. G. S. Bosworth. Engineer, 217 (12 Jun 64) p.1025-6

Effects of background and training on success in engineering. S. P. Hutton & J. E. Gerstl. Chartered Mechanical Engr., 11 (May 64) p.254+. il.

Engineering education must be a continuing process. Machinery, 104 (15 Jan 64) p.115+

**ENGINEERING, Education—cont.**

Engineering teaching in schools. G. B. Harrison. Chartered Mechanical Engr., 11 (May 64) p.279-82. il.

Indian Institute of Technology, Delhi. Sir Willis Jackson. Electronics & Power, 10 (Feb 64) p.40-1. il.

Leyland Motors expand training: annual intake of trainees will be 200. Metalworking Production, 108 (9 Nov 64) p.61-3. il.

On to common engineering and physics? Engineering, 197 (20 Mar 64) p.406. il.

Practical training of engineering students. R. C. Winton. Electronic Components, 5 (Apr 64) p.314-15

Where the best students are engineers. Engineering, 198 (2 Oct 64) p.418-19. il.

**ENGINEERING, Education, Belfast**

Engineering studies at Belfast. Times Rev. of Industry & Technology, 2 (Aug 64) p.73-9. il.

**ENGINEERING, Education, Experiments**

On teaching experimental method. W. G. Wood. Bull. of Mechanical Engng. Education, 3 (Oct/Dec 64) p.337-48. il. refs.

**ENGINEERING, Education, Experiments, Factorial, Evaluation, Carbon resistors, Life tests, Graeco Latin square plans**

Accelerated life-test using a Graeco-Latin-square test plan. H. Schenck, Jr. Bull. of Mechanical Engng. Education, 3 (Jul/Sep 64) p.241-6. il. refs.

**ENGINEERING, Education, Institution of Mechanical Engineers**

Institution examination. Chartered Mechanical Engr., 11 (Jun 64) p.332-3. il.

**ENGINEERING, Education, Laboratories**

Different approach to laboratory work. K. J. Miller. Production Engr., 43 (Aug 64) p.383-8

**ENGINEERING, Education (Management)**

Education for management of engineers: US methods discussed at Civils' meeting. F. H. Barker-Benfield. Contract J., 199 (21 May 64) p.329

Management—the Imperial College way. Engineering, 198 (23 Oct 64) p.520-1

**ENGINEERING, Education, Nigeria**

Training of engineers in Nigeria. K. J. Miller. Chartered Mechanical Engrs., 11 (Feb 64) p.92-5. il. refs.

**ENGINEERING, Education, Projects**

University teaching of creative engineering through design projects. S. V. Hayes & S. A. Tobias. Chartered Mechanical Engr., 11 (Nov 64) p.562-6. il.

**ENGINEERING, Education, Technical colleges**

Should colleges teach engineering? H. J. Turner. Technical Education, 6 (Aug 64) p.396

**ENGINEERING, Education, Universities, Advice bureaux**

Manchester blazes a trail. Times Rev. of Industry & Technology, 2 (Jul 64) p.86+. il.

**ENGINEERING, Education, Universities, Computers**

Digital computer among undergraduates. Engineering, 197 (26 Jun 64) p.850-1. il.

**ENGINEERING, Education, Universities, Malaya**

Engineering faculty of the University of Malaya. Chin Fung Kee. Electronics & Power, 10 (Aug 64) p.255-7. il.

**ENGINEERING, Education, Universities, Mechanics**

Report on "The role of rigid body dynamics in an undergraduate engineering course". B. J. Fielding. Bull. of Mechanical Engng. Education, 3 (Apr/Jun 64) p.123-30

**ENGINEERING, Education, Vocabulary tests**

Engineers lost for words? A. J. Kirkman. Engineer, 217 (22 May 64) p.889

**ENGINEERING, Education, Works visits**

How to run works visits. E. N. Carlett. Chartered Mechanical Engr., 11 (May 64) p.277-9. il.

## FABRICS, Abrasion, Tests

Abrasion results viewed with "great care". Dyer, Textile Printer, Bleacher & Finisher, 131 (6 Mar 64) p.391+. il.

Final report on inter-laboratory abrasion tests. Standing Consultative Conference on Textile Research, Committee of Directors of Textile Research Associations. J. of Textile Inst. Proc., 55 (Apr 64) p.1-12. refs.

## FABRICS, Acrilan, Knitted, Fleecy

Acrilan knitted fleece. G. Hammer-Schmidt. Man-Made Textiles, 41 (Jul 64) p.41-6. il.

## FABRICS, Acrylic fibres, Printing, Dyes

Printing acrylic fibre fabrics. Textile Weekly, 62 (2) (25 Sep 64) p.520+

## FABRICS, Acrylic fibres, Tufted, Manufactures

Cotton tufter turns to acrylics [John A. Stott, Ltd., Blackburn] Man-Made Textiles, 41 (Aug 64) p.63+. il.

## FABRICS, Asbestos fibres

Life problems in industrial asbestos textiles. K. Jowsey & H. Longley. Textile Inst. & Industry, 2 (Jun 64) p.118-21

## FABRICS, Backed, Sewing

Backed cloths: yarns, variety and construction. A. J. Bennett. Textile Manufacturer, 90 (Jan 64) p.8-9. il.

## FABRICS, Blended

Effect of differences in blend content on the appearance of fabrics. F. Hermann & P. P. Townend. Textile Recorder, 82 (Jun 64) p.52-4. il. ref.

## FABRICS, Cellular

Lightweight warmth. W. H. Rees. Textile Inst. & Industry, 2 (Feb 64) p.29-31. il. refs.

FABRICS, Cellulose acetate, Colour television testing. See TELEVISION, Colour, Testing, Fabrics, Cellulose acetate

## FABRICS, Cellulose acetate, Dyeing, Disperse dyes

Report of the committee on the dyeing properties of disperse dyes, pt.1: disperse dyes on secondary cellulose acetate. J. of Soc. of Dyers & Colourists, 80 (May 64) p.237-42. il. ref.

## FABRICS, Cellulosic, Bleaching

Practical aspects of the bleaching of cellulosic materials. C. Garrett. J. of Soc. of Dyers & Colourists, 80 (Mar 64) p.117-23. refs.

**FABRICS, Cellulosic, Dyeing, Monochloro-s-triazine, Catalysts, Amines**

Reaction mechanism and fixation of monochloro-s-triazine dyes on cellulose using tertiary amine catalysts. T. L. Dawson. *J. of Soc. of Dyers & Colourists*, 80 (Mar 64) p.134-43. il. refs.

**FABRICS, Cellulosic, Dyeing, Reactive, Catalysts, Amines**

New catalysts to assist the fixation of reactive dyes. B. C. M. Dorset. *Textile Manufacturer*, 90 (Jan 64) p.24-7. il.

**FABRICS, Cellulosic, Dyes, Reactive, Determination**

Further notes on reactive dyes and their identification on cellulosic fibres. F. Jordinson & R. Lockwood. *J. of Soc. of Dyers & Colourists*, 80 (Apr 64) p.202-4. refs.

**FABRICS, Cellulosic, Finishes, Flameproof**

Flame retardant treatments for cellulosic materials. A. R. Smith. *Dyer, Textile Printer, Bleacher & Finisher*, 132 (4 Sep 64) p.343-8. il. refs.

**FABRICS, Cellulosic, Finishes, Resins, Chromatography, Thin-layer**

Further applications of chromatography in dyeing and finishing. J. C. Brown. *J. of Soc. of Dyers & Colourists*, 80 (Apr 64) p.185-95. il. refs.

**FABRICS, Cellulosic, Finishing**

Modern finishing with resins and cross-linking agents. B. C. M. Dorset. *Textile Manufacturer*, 90 (Jul 64) p.283+

**FABRICS, Cellulosic, Printing, Reactive dyes**

New method of linking dyestuffs to cellulose fibres. *Textile Recorder*, 81 (Mar 64) p.61+. refs.

**FABRICS, Cellulosic-Acrylic copolymers**

Graft co-polymers of acrylic compounds on cellulose. R. W. Moncrieff. *Textile Weekly*, 64 (1 May 64) p.765-7

**FABRICS, Check, Weaving, Colour**

Weave and colour combinations in check and spot fabrics. A. J. Bennett. *Textile Manufacturer*, 90 (Aug 64) p.316+. il.

**FABRICS, Chemically resistant**

You're safer with synthetics, pt.1: protective properties of the new fibres. R. W. Moncrieff. *Man-Made Textiles*, 41 (Jun 64) p.37-40. il.

You're safer with synthetics, pt.2: special fibres provide properties-to-fit. R. W. Moncrieff. *Man-Made Textiles*, 41 (Jul 64) p.34+. il.

**FABRICS, Clothing. See CLOTHING, Fabrics****FABRICS, Coated, Plastics, Electrical conductivity**

Electrically conducting flexible fabrics. *Rubber & Plastics Age*, 45 (Jul 64) p.804

**FABRICS, Coated, Powders, Polythene**

New powder technique of combining. *Textile Weekly*, 64 (31 Jul 64) p.185-6. il.

Take a powder, pt.1. S. Plum. *Man-Made Textiles*, 41 (May 64) p.57+. il.

Take a powder, pt.2. S. Plum. *Man-Made Textiles*, 41 (Jun 64) p.57-8. il.

**FABRICS, Compound, Weaving**

Design and construction of double, etc., fabrics. A. J. Bennett. *Textile Manufacturer*, 90 (Oct 64) p.400-1. il.

**FABRICS, Container materials. See CONTAINERS, Fabric****FABRICS, Cotton**
